

# **ZOO U.**

## **Invasive Ecology Syllabus**

### **FALL 2010**

**Class 1**      **Introduction**      **Saturday, September 25th**

Terminology, talk about the leading  
Invasives here in Pa.

**Class 2**      **Aquatic Invasives**      **Saturday, October 9th**

Guest Speaker: Tom Hayes (Aquarist)  
local aquatic invasives here in our three  
rivers. How invasives are effecting our local  
species.

**Class 3**      **Invasive Plants in our Backyard**      **Saturday, October 23rd**

Learn about local invasive plants  
and how to identify them. Experiment

**Class 4**      **Management**      **Saturday, November 6th**

Management methods that are used,  
disasters and success in management  
methods. Debate!

**Class 5**      **When/How animals become invasive**      **Saturday, November 20th**

What happens when captive animals are  
relased or become feral. The consequences  
and some examples.

**Class 6**      **Projects**      **Saturday, December 4th**

Learn about a number of invasives  
from your peers. Invasive Pot Luck!

\*Please note: This is a tentative schedule. All activities and topics are subject to change!
